Pembroke Pines GIS Newsletter

January 2026

Introducing the Pembroke Pines

GIS Hub

The Pembroke Pines GIS Hub site is a central source for maps, apps, data and insights about the city. It showcases a series of interactive web applications and downloadable PDF maps that highlight key community assets such as parks, schools, businesses, bus routes and more.

Utilities / Public Works

Utility Atlas
Redesign

The Utility Asset Atlas Dashboard serves as a centralized hub for viewing, managing, and analyzing the locations and attributes of various utility assets. The dashboard design has been updated with a tabular layout that displays potable water, sanitary sewer, and raw water assets on separate web maps.

Internal Use Only - Login Required
